-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. **Claims 1-12** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Independent claims 1 and 7 recite "a leader tone having a sound tone at a selected frequency, said leader tone having a first time interval" and "said leader tone frequency being use to determine a frequency offset of said leader tone from said selected frequency which is ten applied to said start symbol and said data symbols as a frequency correction". The specification recites on page 9, lines 9-13, "leader tone frequency being use to determine a frequency offset of said leader tone from said selected frequency which is ten applied to said start symbol and said data symbols as a frequency correction", which is a copy of the claim recitation. If the leader tone is already at a selected frequency, then why is there a need to determine a frequency offset of said leader tone. The specification does teach on the leader tone but the specification fails to describe how the leader tone is used to provide frequency compensation as recited in the claim language. The examiner is not clear on

Art Unit: 2644

how the claimed subject matter is executed, nor clear on what the claim language means.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. **Claims 1-12** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 7 in particular recite said leader tone frequency being use to determine a frequency offset of said leader tone from said selected frequency which is ten applied to said start symbol and said data symbols as a frequency correction". It is unclear to the examiner what is meant by "which is ten" and to what does it refer. The specification only teaches of this on page 9, lines 9-13.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Devona E. Faulk whose telephone number is 571-272-7515. The examiner can normally be reached on 8 am - 5 pm.
